

<i>Resource Component</i>	<i>Stressor</i>	<i>Sources</i>	<i>Ecological Effects</i>	<i>Severity of Threat (High – Medium – Low - Unknown)</i>	<i>Indicator/Vital Sign</i>
Grassland birds	Lack of fire	Development	Reduced habitat; increase in number of edge associated predator species resulting in increased number of nest depredation; displacement of grassland species	High	Grassland species abundance
Grassland plant communities	Exotic Species	Development	Displacement of native species and invasion of exotic species	High	Plant community composition
Agricultural soil	Tillage practices	Agricultural Practices	Reduced productivity/health/abundance of plants on agricultural leases	Medium	Loss of topsoil horizon; nutrient and sediment loading on agricultural field wells.
Stream Water	Nitrogen	Urban Lawns	Algae blooms	High	Dissolved Oxygen
